INDEX TO VOLUME XIV.

A

Alger, F. & C. T. Jackson, on the Mineralogy of Nova Scotia, 305
Ammonia, formation of, 387
Analysis of elastic bitumens, 371
——— of the Pittsburg mineral spring, 124
——— of Tourmalines, 384
Apparatus, chemical, new modifications of, 354
Asbestus, of New Milford, 199
Aurora borealis, notice of, 91
Atomic theory, J. Finch on, 24

B

Barnes, remarks upon his notice respecting magnetic polarity, 121
Beck, Lewis C., on the botany of Illinois and Missouri, 112
—— ——— on the Chlorides of Soda and Lime, 251
Bitumen, analysis of, 371
Bones disinterred on the Mississippi, 186
Botany of Illinois and Missouri, 112
——— of the Pyrenees, 371
Boulders of Primitive Rocks in Ohio, 291
Bromine, new compounds of, 386
Butterflies, emigration of, 387

C

Cabinet in Geology and Mineralogy, 197
Canal, Louisville and Shippingsport, 65
Capillary action, 384
Caricography, appendix to, continued from Vol. XII, p. 297, 351
Carpenter, G. W., on the minerals of Chester county, 1
Chemical equivalents, improved scale of, 202
Chester county, mineralogy of, 1
Children, male and female, proportion between, 372
Chipman, N. on moving stones, 303
Chlorides of Soda and Lime, as disinfecting agents, 251
Chlorine and chlorides, 382
Chromium, on its combinations, 136
Commun, J. Du, on the cause of fresh water springs, 174
Crank motion, remarks upon, 60
Crude Sodas, remarks upon, 41

D

Darlington, Wm., pluviometrical observations by, 29
Daubeny, Prof., notice of his work on volcanos, concluded from Vol. XIII, p. 310, 70

Delaware, minerals of, 1
Density of the air, opposite effects of, on clocks, 375
Doolittle, Isaac, on crank motion, 60
——— Amos, on lunar circles, 397

E

Eaton, Prof., on Geological nomenclature, 145
—— —— on Geological Strata, 359
Eastern Seas, voyage to, by Capt. B. Hall, 206
Elephant, fossil tooth of, 31

F

Falls, Tockoa and Tallulah, notice of, 209
Finch, J. on the Mineralogy of West Chester, 15
——— on the boundaries of empire, 18
——— on the atomic theory, 24
Field, Martin, on the profile mountain of New Hampshire, 64
—— ——— Meteorological table, 398
Fire, mode of preserving buildings from, 379
Fluates, 387
Fluoric acid, 387
Fluxions, a theory of, 330
Fogs, polar, 378
Fossil bones, discovered in France, 203
Foster, A. notice of Tockoa Falls, by, 209
Friction, effects of, 194

G

Gas, a new combustible one, 205
Geological nomenclature, by Prof. Eaton, 145
——— specimens for sale, 190
——— strata, 359
Gold, artificial, a new alloy, 371
Goodrich, C. E. on a peculiarity of vision, 264
Gymnasium, New Haven, 400

H

Halle university, jubilee fête at, 381
Hansteen, Prof. on the influence of polar lights on the magnetic needle, 109
Hare, R. on Pneumatic cistern, 200
——— new apparatus, 354
Harlan, R. on bones disinterred upon the Mississippi, 186
Hayes, Augustus R. on the combinations of chromium, 136
Hildreth, S. P. meteorological observations by, 63
——— —— shells found near Marietta, 276
Hitchcock, Prof. mineral localities by, 215
Human race, species and varieties of, 379
Hydro pneumatic cistern of Dr. Hare, 200

I

Inertia, remarks upon, 50
Inflammable Gas, inspiration of, 370
Iron, native, 183

J

Jackson, C. T. & F. Alger, on the minerals of Nova Scotia, 305

L

Land and water, distribution of, 375
Lapham, J. A. notice of the Louisville canal, by, 65
Leaden pipes, strength of, 369
Life preservers, 189
Light, intense, 385
Lincoln, B. on a water spout, 171
Lion, Lucius, observations on surveying instruments, 268
Long, Lieut. his steam engine, 169
Lyceum of N. History of New York, proceedings of, 190

M

Magnetic Polarity, remarks on Mr. Barnes' notice respecting, 121
Mammoth found in New Jersey, 188
Manganese in Vermont, 190
Maryland, minerals of, 1
Mastodon, skeleton of, 31
——— teeth found in Con. 187
Meade, Wm. analysis of a mineral spring by, 124
Merritt, Wm. H. account of the Welland canal, by, 159
Meteor of a green color, 199
Meteorological observations at Marietta, 63
——— report by Prof. Olmsted, 176
——— Table, 398
Mineral localities, 215
Mines of Gold and Platina, 204
Moon, circles around, 397
Motion, on the principles of, 297
Moving stones in lakes and ponds, 303

N

New Haven Gymnasium, 400
Nitrification, theory of, 385
North Carolina, geology of, 230

O

Oil, from the seed of the Croton Tiglium, 369
Olmsted, Prof. notice of his geological report, 230
——— ——— meteorological report by, 176

P

Paper, a new mode of preparing it, 373
Paragrèles, efficacy of, 37
Physical Geography, effect of, or the boundaries of empires, 18

Plane surfaces, not separable by blowing, 395
Pluviometrical observations, 29
Polar fogs, 379
Porcelain, American, 198
Premiums awarded by the French academy, 380
Prizes of the academy of sciences, 389
Profile mountain of New Hampshire, 64

Q

Quartz, gelatinous, 391
Quinine, sulphate of, 399

R

Ramond, on the vegetation of the Pyrenees, 377
Rensselaer, J. Van, on the fossil tooth of an elephant, 31
Revere, J. on the crude, sodas, 41
Review of Prof. Daubeny's work on volcanos, concluded from Vol. XIII, p. 310, 70
Rewards of science, 389
Rhubarb, different varieties of, 33
Rhubarbarine, cathartic effects of, 33
Rochefoucauld, le Duke de la, 392
Rural economy, 390

S

Sapphire in the emery of Naxos, 205
Shells found near Marietta, 276
Shepard, C. U. on native iron, 183
Silex, solubility of, 385
Silliman, B. D. notice of an aurora borealis, by, 91
Soapstone, its uses, 476
Soda and Lime, chlorides of, 251
Southern review, 199
Springs, fresh water, on their cause, 174
Steatite, notice of, 376
Steam engine, by Lieut. Long, 169
Sulphate of Quinine, 390

T

Tappan, B. on the boulders of primitive rocks, 291
Tourmalines, analysis of, 384
———— of Chesterfield, for sale, 400

V

Vanuxem, Prof. on the pressure of water at great depths, 194
Vision, on a peculiarity in, 264

W

Water Spout, 171
Water, pressure of, at great depths, 194
Welland canal, 159
West Chester, geology and mineralogy of, 15
Wright, E. a theory of fluxions by, 330
